### **This Is Why The Soviet Union Lost 'The Space Race' To The USA**

The Space program of the Union of Soviet Socialist Republics, commonly known as the Soviet space program, was the national space program of the Union of Soviet Socialist Republics, active from the 1930s until the state's collapse in 1991. The Soviet Union's space program was mainly based on the cosmonautic exploration of space and the development of the expendable launch vehicles, which had been split between many design bureaus competing against each other. Over its 60-years of history, the Sov

### **Soviet space program - Wikipedia**

Although US and Soviet designs for rockets for space launch applications started from essentially the same point (the German Aggregate rockets) they diverged fairly radically in basic design principles, based upon the available manufacturing and materials technology, concept of operations through launch flow, prior experience and data, and in no small part the prejudices and preconceptions of the dominant personalities for each development.

The Space Race was a 20th-century competition between two Cold War rivals, the Soviet Union (USSR) and the United States (US), to achieve firsts in spaceflight capability. It had its origins in the ballistic missile-based nuclear arms race between the two nations following World War II. The technological advantage required to rapidly achieve spaceflight milestones was seen as necessary for ...
