The Familia Presto Van, with OHC engines, received chassis numbers MP3xV/SP3xV for the 1000 (3-door/5-door) and MT2xV/ST2xV for the 1200. The five-door Van range was gradually expanded downwards as the three-door models dropped in popularity. The "1200" was offered in the United States in 1971 and again for the 1973 model year.

### Mazda Familia - Wikipedia

If you had the timing right, it would not be backfiring. After you remove the timing belt cover you will see the two small gear wheels on the top of the engine, there should be, just above the center bolts of the gear, a little raised bump or notch these are the TDC (top dead center) marks they should also have a corresponding mark on the engine housing that they will need to be pointed at.

Since belts are a service item, timing belt service needs to be part of a good maintenance plan. We recommend that the timing belt be replaced, along with the water pump and accessory drive belts, at 90,000-100,000 miles. If the customer has budget concerns, we'll explain why we recommend the pump replacement and let them take the gamble that it will last another 100,000 miles - with the ...

Install the new timing belt. Make sure to line up all the timing marks. There is a notch on the crankshaft that points straight up, and the notch on the "I" on the left pulley lines up with the notch on the "E" on the right. Use the open-ended wrenches on the flats on the camshafts to force them to line up.

### Mazda Engine Timing

Many times people will wait past 120,000 miles and their belt will break. If the timing belt breaks the car will stop wherever it happens to be. Depending on what type of car you own the timing belt breaking can be very costly. Some engines use interference valve engines which means the valves open far enough to hit the piston if not kept in time.
