### **Roots In Sewer Line Solution**

A sewer machine is used to cut the roots out of a sewer line. The machine is attached to a cable with a special root cutting attachment at the end. The cable is fed into the line and spins while the root cutting blades cut the roots. Depending on the amount of growth, the remaining debris might need to be flushed out of the system.

The roots create a type of net that will catch anything you send down the line to create annoying clog that will slow your drainage system way down. If the roots are allowed to continue growing, they can apply enough pressure to collapse your sewer pipes, resulting in extremely costly damage.

## **How to Kill Tree Roots in a Sewer Line | Terry's Plumbing**

Tree roots may seek moisture escaping from sewer lines. As warm water passes through sewer lines, a vapor forms on the exterior of the sewer pipe. The soil surrounding the sewer pipe absorbs the vapor moisture. Tree roots in the vicinity will grow toward the moist soil and may eventually enter the sewer line, where they can block the flow.

## **Removing Tree Roots from Sewer Lines | Invisible Excavations**

A line that is completely covered in roots, before being jetted, can be spotless afterwards. (Unless the pipe is falling apart then we will have to jet at a lower pressure.) This hydro-jetter goes into the line and pressure washes the line from the inside. It is powerful enough to disintegrate roots up to a quarter of an inch.

## **How to Fix Roots in a Sewer Line? - 1 Tom Plumber**

Tree roots naturally seek out the best source of moisture and are attracted to the limitless supply of wastewater found in sewer lines. Roots enter through any joints or gaps in between pipes. As they draw moisture from the sewer line, these roots not only multiply but expand - which over time leads to structural decay of the pipe and eventual collapse.

A powered sewer auger is sent down a sewer line with a rotating spiral head. The head has teeth on it much like a reciprocating saw blade. The rotating action cuts the roots, but many remain within the sewer line. This clears the roots from the sewer line, but doesn't solve the problem — the roots will grow back.
